ZANGO, INC.,

Plaintiff,

v.

PC TOOLS PTY, LTD.,

Defendant.

No. CV-07-0797 JPD

**PLAINTIFF ZANGO'S MOTION FOR  
TEMPORARY RESTRAINING ORDER**

**I. RELIEF REQUESTED**

Plaintiff Zango, Inc. ("Zango") is a Bellevue-based company that provides content to its customers via the Internet. On May 11, 2007, Zango learned that a scanning application ("Spyware Doctor") distributed by defendant PC Tools Pty Ltd. ("PC Tools") was systematically eliminating Zango's software and products from the computers of millions of users. Spyware Doctor provides the computer user with no specific warning that Zango's software application would be deleted; instead, Zango's software simply vanished from the user's computer, leaving Zango with no means of contacting or communicating with its customers.

PLAINTIFF ZANGO'S MOTION FOR TEMPORARY  
RESTRAINING ORDER – Page 1  
No. CV-07-0797 JPD

ORIGINAL

Spyware Doctor's extensive, ongoing and irreversible attack on Zango warrants immediate injunctive relief. Here are just a few of the irreparable consequences Zango will continue to suffer absent injunctive relief:

- Zango customers who install Spyware Doctor version 5.0.184 ("SD 184") receive no explicit notice that the Spyware Doctor program is irrevocably removing Zango products from their computers. Accordingly, when these customers are unable to access their Zango programs after the installation of Spyware Doctor, they unfairly (but understandably) blame Zango for the programs' disappearance. As a result, PC Tools' product is causing Zango to lose existing customers (and their goodwill) on daily basis.
- Because Zango does not collect personal identifying information from its customers, customers that Zango loses due to PC Tools' attack are lost forever; similarly, Zango has no means of contacting its customers and warning them of the attack. For this reason, PC Tools is not just irrevocably erasing Zango products from users' computers, it is also irrevocably erasing hard-earned customers from the rolls of Zango's customer lists.
- Spyware Doctor 184 also causes Zango to lose future customers. Once installed, the Spyware Doctor program prevents the future installation of Zango products, which means that Zango is forever prevented from reaching these potential customers.

There is no justification for Spyware Doctor's attack on Zango's products. Richard Purcell – a world-renowned independent computer privacy expert – has conducted an exhaustive review of Zango's products and policies and pronounced them to be benign. *See* Declaration of Richard Purcell (hereinafter "Purcell Decl."). Indeed, PC Tools itself has *admitted* that Zango's products are "not malicious." *See* Exhibit A (e-mail communication of March 28, 2007 from director of PC Tools' Malware Research Centre) to Declaration of Gregg Berretta (hereinafter "Berretta Decl.>").

Given these uncontested facts, there is no question that Zango will prevail in the claims set forth in the Complaint it quickly filed after learning of PC Tools' misconduct. Indeed, just one day after Zango filed its Complaint (and one day before a scheduled TRO hearing), an attorney for PC Tools contacted an attorney for Zango, agreed that PC Tools was

1 incorrectly classifying Zango's products and assured Zango that PC Tools would solve the  
2 problem as soon as possible. Based on these assurances, Zango agreed to postpone the  
3 scheduled TRO hearing.

4 PC Tool's assurances have so far proved illusory and Zango can afford to wait no  
5 longer for the relief PC Tools has promised. As a result of Spyware Doctor's widespread  
6 distribution via Google, Zango is suffering massive irreparable harm to its business model and  
7 reputation *right now*, and without quick intervention by this Court, Zango will continue to  
8 suffer irreversible harm that will never adequately be compensated at law. Accordingly,  
9 Zango seeks a temporary restraining order, and, ultimately, a preliminary injunction,  
10 compelling PC Tools to immediately remove Zango's software programs from the Spyware  
11 Doctor detection database.

## 12 **II. STATEMENT OF FACTS**

13 Zango is an online media company based in Bellevue, Washington that provides  
14 consumers free access to a large catalog of online videos, games, music, tools and utilities.  
15 Zango's catalog of content is offered to customers free of charge and is sponsored by  
16 advertising that customers agree to view as a condition of using the products. Zango also  
17 offers a premium version of its software that gives consumers access to Zango's content  
18 catalog without advertising.

19 Zango takes extensive precautions to ensure that every Zango customer affirmatively  
20 and knowingly consents to download, installation and continued usage of Zango software. An  
21 independent audit conducted by Richard Purcell, CEO of Corporate Privacy Group, released  
22 on May 7, 2007, concluded that Zango is fully compliant with all reasonable and  
23 recommended privacy requirements, and, in particular that Zango's privacy program ensures:  
24 (1) user notification of the program or application's existence; (2) user consent to the

1 download or installation of the program or application; and (3) user control of the program or  
2 application. *See* Purcell Decl., Ex. B. As a result of Zango's commitment to protecting the  
3 privacy of its customers, Zango can be certain, and Mr. Purcell has verified, that all users who  
4 have installed Zango's applications or products since January 1, 2006 have done so  
5 consensually.

6 PC Tools is in the business of developing and marketing various computer protection  
7 and security software programs. One such program is "Spyware Doctor." On or about March  
8 29, 2007, Google, Inc. began including a version of Spyware Doctor called "Spyware Doctor  
9 Starter Edition" (hereinafter, "Starter Edition") in its "Google Pack" software package. Given  
10 Google's massive Internet presence, the number of consumers who have downloaded and  
11 installed Starter Edition since March 29 likely reaches into the millions.

12 On May 11, 2007, Zango learned that Starter Edition is disabling Zango installations  
13 to the point that existing, consensually installed Zango software already resident on a  
14 consumer's computer no longer functions. Further testing revealed that while the Starter  
15 Edition software prevents the display of advertisements from Zango on behalf of Zango's  
16 advertising partners (which is the primary source of Zango revenue), some existing Zango  
17 customers nonetheless are still able to access the content in Zango's catalog (i.e., the movies,  
18 games, screensavers, and the like). Starter Edition software damages the Zango application  
19 immediately upon installation, without giving any specific notice whatsoever to Zango  
20 customers or providing any opportunity for Zango customers to consent or intervene.

21 These actions stand in stark contrast to the treatment Zango's products received from  
22 security software application "Ad-Aware SE" (hereinafter "Ad-Aware"), which was formerly  
23 offered as part of the "Google Pack," and which Spyware Doctor replaced. Ad-Aware is  
24 manufactured and distributed by a company called Lavasoft AB, which is not a party to this

1 action. Unlike Spyware Doctor, the only action Ad-Aware took with respect to Zango's  
2 applications was to notify users upon installation that Zango products will make a change to  
3 the user's Windows registry. Ad-Aware provided an identical warning to users upon  
4 installation of all non-malicious software, including such popular downloadable applications  
5 as the Google or Yahoo! toolbars.

6 Crucially, Ad-Aware provided users with an opportunity to choose whether to take  
7 any action with respect to Zango products or whether to allow Zango products to remain  
8 installed on the user's computer. Zango customers who install Spyware Doctor 184 are given  
9 no such notice. Immediately upon installation, Spyware Doctor damages and destroys  
10 Zango's applications. The fact that Zango's customers are unable to intervene in this process  
11 is attested to by the emails Zango has received from customers complaining that Spyware  
12 Doctor disabled their Zango products. *See Berretta Decl., Ex. B.*

13 Internal testing of Starter Edition by Zango also showed that, after a brief period of  
14 time following the initial disabling of Zango's software, Starter Edition repeatedly delivers a  
15 specific type of message format (sometimes called a "toaster") on the user's screen stating  
16 "Malicious Action Blocked" and identifying Zango's software as an "Elevated Risk." As PC  
17 Tools well knows, and has admitted, characterization of Zango's products in this manner is  
18 not accurate. In an email communication sent March 28, 2007, Jim Meem, the director of PC  
19 Tools' Malware Research Centre, stated that "[w]e [PC Tools] have concluded that Seekmo  
20 [one of the four essentially identical Zango software brands] *is not malicious.*" (Emphasis  
21 added.) *Berretta Decl., Ex. A.* Yet this is precisely how Spyware Doctor, PC Tools' flagship  
22 product, chooses to label Zango products to Zango customers.

23 Finally, testing has also shown that consumers who have Starter Edition already  
24 installed on their computers are unable to install Zango's software, thereby eliminating Starter

1 Edition users as potential customers of Zango's software. Again, Starter Edition provides no  
2 opportunity for users who wish to download and install Zango's software to override Starter  
3 Edition and do so.

4 Zango has suffered significant damage to its reputation, customer base and business  
5 model as a result of the actions of the PC Tools software described above. A revenue analysis  
6 performed by Zango's Director of Finance shows an abrupt change from positive revenue  
7 momentum to sharp negative revenue momentum taking place on approximately April 1, i.e.,  
8 coinciding with Starter Edition's inclusion in Google Pack. *See* Declaration of Tom Allan  
9 (hereinafter "Allan Decl."), Exhibit A. In addition to the damage inflicted by severing  
10 Zango's relationships with existing and contemplated customers, PC Tools' actions are likely  
11 to have a chilling effect on Zango's ability to partner with new content providers and  
12 distribution channels, thereby disrupting Zango's business model. Moreover, being labeled  
13 "malicious" by an anti-spyware application damages Zango's reputation in the marketplace, a  
14 reputation that Zango has worked hard to achieve.

15 Beginning on May 11, Zango repeatedly contacted senior PC Tools' employees,  
16 including its CEO, General Counsel, and the Head of its Malware Research Centre, to request  
17 the removal of Zango products from the Starter Edition detection database. Complying with  
18 this request would not be onerous for PC Tools, as detection databases are typically updated  
19 hourly. Berretta Decl. ¶¶ 14, 15. Nor would removing Zango products from the detection  
20 database negatively impact PC Tools customer base or potential future customers seeking  
21 protection from spyware, as all Zango users have consensually downloaded Zango's software.  
22 PC Tools ignored Zango's requests.

23 After PC Tools refused to remove Zango products from its detection database, Zango  
24 filed a complaint in King County Superior Court on May 15, 2007. On May 16, 2007, Zango

1 gave PC Tools notice that it planned to seek a TRO on May 17, 2007. In a bid to delay the  
2 scheduled TRO hearing, PC Tools assured Zango that it would reclassify and modify its  
3 software to eliminate the harm Zango was incurring (and continues to incur). Based on these  
4 assurances, Zango agreed to delay the hearing.

5 PC Tools' assurances notwithstanding, Zango continues to be harmed, as the version  
6 of Spyware Doctor that is on the Google website continues to damage and delete Zango  
7 products without user consent. Equally important, Zango continues to suffer irreparable harm  
8 from earlier versions of Spyware Doctor.

9 In the last week, Zango has repeatedly complained about PC Tools' failure to modify  
10 its products and the irreparable damage it suffers every day from the version of SD that  
11 remains on the Google Pack web site. Accordingly, on Tuesday, May 22, Zango gave PC  
12 Tools notice of its intent to seek a TRO from the ex parte department of the King County  
13 Superior Court the next day. After receiving notice of the May 23 hearing, PC Tools'  
14 attorney represented that PC Tools shipped a modified version of Spyware Doctor to Google  
15 on May 23. Nevertheless, although PC Tools has apparently made updated versions of  
16 Spyware Doctor available to other clients, as of the current date and time, SD 184 remains on  
17 the Google Pack website. On May 24, 2007, PC Tools removed this case to this Court.

### 18 **III. STATEMENT OF ISSUES**

19 Whether the Court should enter a temporary restraining order and preliminary  
20 injunction compelling defendant PC Tools to remove Zango's software programs from the  
21 Spyware Doctor detection database.

### 22 **IV. EVIDENCE RELIED UPON**

23 Zango relies upon the Declarations of Robert Purcell, Gregg Berretta, Tom Allan and  
24 the exhibits attached therein.

## V. AUTHORITY

### A. Legal Standard

In determining whether to issue a temporary restraining order or preliminary injunction, federal courts in the Ninth Circuit consider: (1) the likelihood of success on the merits, (2) the possibility that the plaintiff will suffer irreparable injury without injunctive relief, (3) the extent to which the "balance of hardships" favors the plaintiff, and (4) whether injunctive relief would advance the public interest (in certain cases). *Los Angeles Mem'l Coliseum Comm'n v. Nat'l Football League*, 634 F.2d 1197, 1200 (9<sup>th</sup> Cir. 1980); *Del Toro-Chacon v. Chertoff*, 431 F. Supp. 2d 1135, 1140 (W.D. Wash. 2006). See also *Citizens Alliance to Protect our Wetlands v. Wynn*, 908 F. Supp. 825, 829 (W.D. Wash. 1995) (the standard for preliminary injunctions also applies to temporary restraining orders). "The analysis is often compressed into a single continuum where the required showing of merit varies inversely with the showing of irreparable harm." *Del Toro-Chacon*, 431 F. Supp. 2d at 1140. Therefore, the movant may satisfy its burden "by demonstrating either (1) a combination of probable success on the merits and the possibility of irreparable injury or (2) that serious questions are raised and the balance of hardships tips sharply in its favor." *Los Angeles Mem'l Coliseum*, 634 F.2d at 1201. As will be demonstrated, Zango satisfies these requirements.

### B. Zango is Likely to Succeed on the Merits.

Zango's first cause of action against PC Tools, intentional interference with Zango's contractual relations or business expectancy, requires the following elements:

- (1) the existence of a valid contractual relationship or business expectancy;
- (2) that the defendant had knowledge of that relationship;
- (3) an intentional interference inducing or causing a breach or termination of the relationship or expectancy;
- (4) that defendant interfered for an improper purpose or used improper means; and
- (5) resultant damage.

1 *Leingang v. Pierce County Medical Bureau*, 131 Wn.2d 133, 157, 930 P.2d 288 (1997)  
 2 (internal citations omitted).<sup>1</sup>

3 The likelihood that Zango will prevail on this cause of action is overwhelming. Zango  
 4 has a valid contractual relationship with its existing customers and a valid business  
 5 expectancy in future customers of Zango products. *See Newton Ins. Agency & Brokerage,*  
 6 *Inc. v. Caledonian Ins. Group, Inc.*, 114 Wn. App. 151, 158, 52 P.3d 30 (2002) ("A valid  
 7 business expectancy includes any prospective contractual or business relationship that would  
 8 be of pecuniary value."). PC Tools clearly had knowledge of the relationship between Zango  
 9 and its customers as well as Zango's prospective business prospects and equally clearly  
 10 purposefully interfered with those relations and prospects by disabling Zango's software and  
 11 by preventing any future customers from being able to install Zango software. *See id.*  
 12 ("Interference with a business expectancy is intentional 'if the actor desires to bring it about  
 13 or if he knows that the interference is certain or substantially certain to occur as a result of his  
 14 action.'") (quoting Restatement (Second) of Torts § 766B cmt. d). Moreover, PC Tools  
 15 interfered for an improper purpose – advancement of its own commercial interests at Zango's  
 16 expense – and its bad faith is evident by its continuing refusal to remedy the ongoing damage  
 17 being inflicted on Zango. Finally, the resultant damage to Zango is self-evident: PC Tools'  
 18 actions have caused and continue to cause substantial financial damage by severing the  
 19 relationship between Zango and its current and potential future customers (in addition to the  
 20 damage Zango is suffering to its reputation and business model).

21 Zango is very likely to prevail on its second cause of action against PC Tools as well.  
 22 Liability for trade libel attaches where a defendant: (1) publishes false and disparaging

---

23  
 24 <sup>1</sup> Federal courts apply state tort law in diversity cases. *Estate of Domingo v. Republic of*  
*Philippines*, 694 F. Supp. 782, 785 (W.D. Wash. 1988).

1 statements concerning the quality of the plaintiff's product; (2) does so with the intent that  
 2 such publication results in harm to the pecuniary interest of the plaintiff, or either recognizes  
 3 or should recognize that such harm is likely; and (3) does so with actual malice (i.e., either  
 4 knows that the statement is false or acts in reckless disregard of its truth or falsity).

5 Restatement (Second) of Torts § 623A; *see also Auvil v. CBS "60 Minutes"*, 67 F.3d 816, 820  
 6 (9th Cir. 1995) (assuming that Washington recognizes trade libel based on Washington Court  
 7 of Appeals decision citing Restatement § 623A for the proposition that plaintiffs seeking  
 8 damages in disparagement face a higher burden of proof than those seeking damages in  
 9 defamation). Here, PC Tools has labeled, and continues to label, Zango's products as an  
 10 "infection," as "malicious" and as an "elevated risk." Labeling Zango products in this manner  
 11 is likely to mislead existing customers into believing that Zango applications are damaging  
 12 their computers or somehow compromising their privacy, which, as PC Tools knows, is not  
 13 the case. Future customers who are blocked from downloading Zango products are likely to  
 14 reach the same conclusion. Zango has worked hard to achieve a good reputation in the  
 15 marketplace, and to foster relationships with customers, content-providers, and distribution  
 16 channels. Spyware Doctor's baseless and, yes, malicious, attacks on Zango's products  
 17 threaten all that Zango has worked to achieve.

18 Zango will likewise be able to establish its cause of action under the Washington  
 19 Consumer Protection Act ("CPA"). A plaintiff makes a *prima facie* showing of a CPA  
 20 violation when it shows (1) an unfair or deceptive act; (2) in trade or commerce; (3) impacting  
 21 the public interest; (4) injuring Plaintiff in its business or property; and (5) causation.

22 *Hangman Ridge Training Stables v. Safeco Title Ins. Co.*, 105 Wn.2d 778, 780, 719 P.2d 531  
 23 (1986). PC Tools specifically markets itself as a purveyor of security software that protects  
 24 consumers from so-called "spyware." PC Tool's unfair and deceptive conduct thus has a

1 public interest impact, and the conduct clearly injured and will continue to injure Plaintiff's  
2 business, reputation, and goodwill.

3 **C. PC Tools' Conduct Has Caused, and Will Continue to Cause, Irreparable Injury**  
4 **to Zango.**

5 Courts routinely recognize that significant loss of customers or business goodwill and  
6 damage to business reputation may constitute substantial or irreparable harm justifying  
7 injunctive relief. *See, e.g., Multi-Channel TV Cable Co. v. Charlottesville Quality Cable*  
8 *Operating Co.*, 22 F.3d 546, 552 (4th Cir. 1994) ("[W]hen the failure to grant preliminary  
9 relief creates the possibility of permanent loss of customers to a competitor or the loss of  
10 goodwill, the irreparable injury prong is satisfied."); *K-Mart Corp. v. Oriental Plaza, Inc.*,  
11 875 F.2d 907, 915 (1st Cir. 1989) ("[H]arm to goodwill, like harm to reputation, is the type of  
12 harm not readily measurable or fully compensable in damages -- and for that reason, more  
13 likely to be found 'irreparable.'"); *Ginorio v. Gomez*, 301 F. Supp. 2d 122, 134 (D.P.R. 2004)  
14 (plaintiffs sought an injunction to stop the defendant from revoking their insurance licenses;  
15 court found that plaintiff had established irreparable injury where evidence showed that the  
16 "the insurance business is one based on trust and . . . the revocation of plaintiffs licenses, even  
17 if temporary, would result in unmeasurable harm to plaintiffs' reputation[.]" and that plaintiffs  
18 "existing clients and any potential new ones would have to take their business elsewhere.").

19 Here, as a result of PC Tools' conduct, Zango has suffered damages to its customer  
20 base, its reputation, and its business model. In addition to the direct financial damages being  
21 inflicted by PC Tools, Zango faces the ongoing prospect of permanent loss of customers to  
22 competitors in the marketplace, loss of goodwill, and damage to its reputation. These are not  
23 losses that are easily recouped or which may be cured solely by recovery of money damages.  
24

1       **D.     The Balance of Hardships Tips in Zango's Favor.**

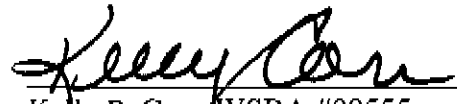

2               The balance of hardships favors relief to Zango. Zango will suffer—in fact, it is  
3 already suffering—incalculable harm if the temporary restraining order is not granted. Day  
4 by day, Zango is losing its customers and suffering damage to its goodwill and reputation.  
5 Conversely, the relief requested by Zango asks very little of PC Tools, and would have no  
6 effect on its existing customer base or future customers. Given the significant ongoing  
7 damages being suffered by Zango, and the ease with which PC Tools may remedy the  
8 situation, balancing of the equities favors granting the present motion.  
9

10                               **VI. CONCLUSION**

11               The purpose of a temporary restraining order is to preserve the status quo and prevent  
12 irreparable harm pending further court proceedings. *Granny Goose Foods, Inc. v. Bhd. of*  
13 *Teamsters & Auto Truck Drivers*, 415 U.S. 423, 439 (1974). That is all that Zango seeks  
14 here. Zango will have probable success on the merits, and it has already suffered irreparable  
15 injury (and will continue to do so). The balance of hardships tips sharply in Zango's favor.  
16 For the foregoing reasons, this Court should issue a temporary restraining order, and,  
17 ultimately, a preliminary injunction, compelling PC Tools to remove Zango's software  
18 programs from the Spyware Doctor detection database.

**CERTIFICATE OF SERVICE**

The undersigned declares as follows:

I am employed at Corr Cronin Michelson Baumgardner & Preece LLP, attorneys of record for Plaintiff Zango, Inc. herein.

I hereby certify that on May 25, 2007, I electronically filed the attached foregoing with the Clerk of the Court using the CM/ECF system, which will send notification of such filing to the following persons:

J. Ronald Sim  
Maren R. Norton  
Stoel Rives LLP  
600 University Street  
Suite 3600  
Seattle, WA 98101-3197

and I hereby certify that I have delivered via U.S. Mail the document to the following non CM/ECF participants:

N/A

I declare under penalty of perjury under the laws of the State of Washington that the foregoing is true and correct.

DATED this 25 day of May, 2007, at Seattle, Washington.
